

LIFTOCON

We Makes Your Material Handling Easy...

Liftocon Equipments Pvt. Ltd.

About Us.

“LIFTOCON” is one of the India's leading manufacturer and solution provider company in the field material handling equipment's. Our aim is to provide more efficient and problem-solving solution by supplying great quality of material with minimum cost, which makes your material handling Easy, Efficient & and Reliable.

“LIFTOCON” is started by two technocrats, who's having great experience of 15+ years in the field of material handling equipment's, especially by providing various lifting & conveying solution to prestigious customers.

Our deep industry knowledge & experience help us to provide various material handling solution to our esteemed and diversified customers in field of FMCG, Food, E-commerce, Warehousing & Logistics, Textiles, Chemicals and Auto industries

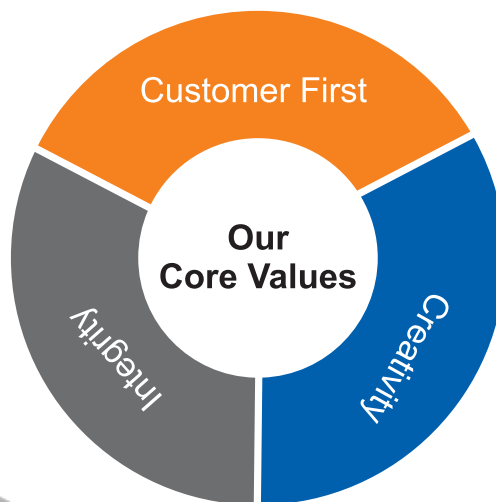

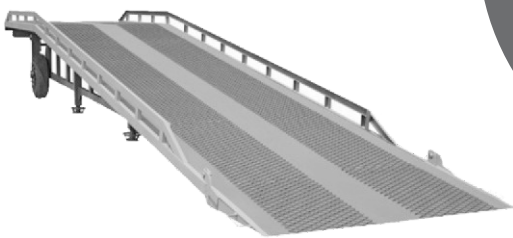

Our Vision :

To become a globally known company in the field of material handling solutions by doing various innovations.

Our Mission:

To give the best solution by understanding customers need and enlarging our reach.

Our Core Values

LIFTOCON

We Makes Your Material Handling Easy...

Truck Loading/Unloading conveyor solution

Application;

Widely used for loading/ un loading of bags/ corrugated boxes/ Oil tin/ oil can, fabric rolls from ground or platform to various trucks in very efficient way.

Features;

- Customize solution in the length of 6mtr/ 8 mtr.
- Belt width : 500mm/ 600mm/800mm/ 1000mm
- Hydraulic operated for height adjustment.
- Chassis mounted for the movement.

Benefits;

- Reduces labor dependency.
- Reduces man power cost and increases the profitability.
- Increases the loading/ unloading efficiency.
- Easily movable, can be same truck loader at different docks

Telescopic Loading/Unloading conveyor solution

Application;

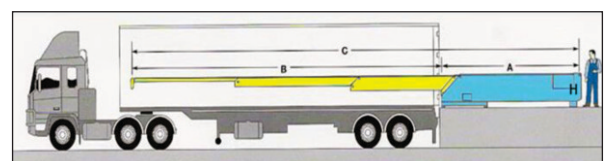

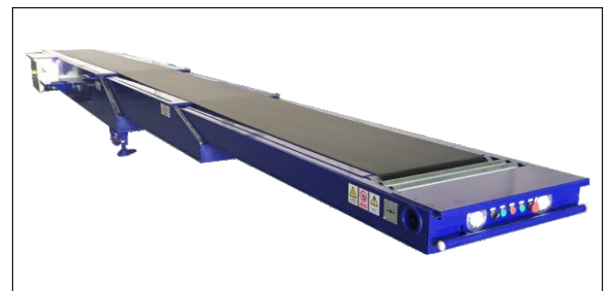

Widely used for loading/ un loading of bags/ corrugated boxes/ Oil tin/ oil can, fabric rolls from ground or platform to various trucks in very efficient way.

Features;

- Customize solution in the length of 20 Feet/40 Feet
- Belt width : 500mm/ 600mm/800mm/ 1000mm
- Hydraulic operated for height adjustment.
- Chassis mounted for the movement.

Benefits;

- Reduces labor dependency.
- Reduces man power cost and increases the profitability.
- Increases the loading/ unloading efficiency.
- Easily movable, can be same truck loader at different docks

LIFTOCON

We Makes Your Material Handling Easy...

Expandable -Dock less truck loading/ unloading conveyor.

Application,

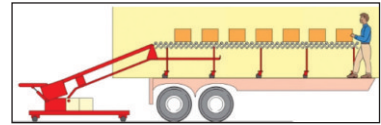

Its widely used to adjust the height difference of various trucks during loading/ unloading activity.

Features;

- Same truck loader can be used for with or without dock/ bay site.
- With the help of expandable roller conveyor, loading length inside the truck can be adjust as per the requirement.

Benefits,

- Its reduces the manpower & time taken to load/ unload the vehicle.
- Its reduces the to & fro motion of person inside the truck.
- Its economic replacement to telescopic conveyor belt conveyor.

Mobile/ Movable conveyor solution

Application,

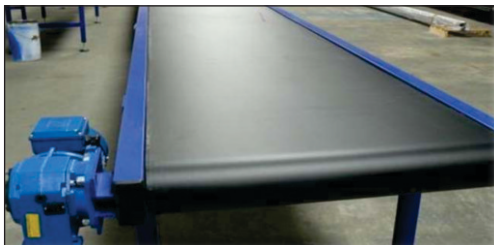

Widely used for conveying boxes and bags very quickly from one place to another place in warehouses/ manufacturing units.

Features;

- Customize solution in the length of 6mtr/ 8 mtr/ 10 mtr/12 mtr
- Belt width : 500mm/ 600mm/800mm/ 1000mm/ 1500mm/2000mm
- Chassis mounted.

Benefits;

- Easily movable, can be shifted from one place to another place as per requirement.

Roller conveyors

Fix gravity/ Powered roller conveyor

- It can be designed in gravity or powered type roller conveyor.
- Widely used to transfer palletized load from one location to another location.

Flexible Expandable gravity roller conveyor

- Its widely used to transfer the boxes, crates, tins from one place to another.
- Its length and turning can be the adjust as per our requirement.
- Its very easy to move.

Powered Flexible Expandable roller conveyor

- Its widely used to transfer the boxes, crates, tins from one place to another with the help of power.
- It can be easily transfer or shift to another location.

LIFTOCON

We Makes Your Material Handling Easy...

Electro Hydraulic Scissor Lift

We manufacture the completely customized & standard range of “Electro-Hydraulic Scissor Lift”.

Feature:

- Ideal for loading un-loading from various heights & shifting the material from shop floor to vehicle.
- Can be design the capacity from 300kgs to 50000Kgs (50Ton)
- Lifting height up to 12000MM
- Available in variations of heavy duty, medium duty & light duty.

Safety Feature

- Heavy duty rigid design gives job safety & durability & Easy to relocate
- Power pack will be placed inbuilt or as per customer requirement.
- Self lubricated graphite bushes to ensure the trouble free operation.
- Hose burst valve ensure the safety in case of hose rupture.
- Manual relief valve ensures to take lift down in case of power failure.
- Overload protection provided

High Raised – Movable Scissor Lift

We manufacture completely customized & standard range of “High Raised – Movable Scissor Lift”.

Features:

- Liftocon provide “High Raised – Movable Scissor Lift” up to 16meters height and 500kgs capacity.
- Ideal used for maintenance purpose.
- We offer different variations of like AC operated, Semi- Electric & self propelled operated with AC & DC drive.

Safety Feature

- Chequered plate with anti-skid safety for operator.
- Hose burst valve ensure the safety in case of hose rupture.
- Overload protection provided
- Manual relief valve ensures to take lift down in case of power failure.
- Outriggers provided for anti- fall.
- Hand railing with door provided for operator safety.

LIFTOCON

We Makes Your Material Handling Easy...

Electro- Hydraulic Goods Lift – Double Mast

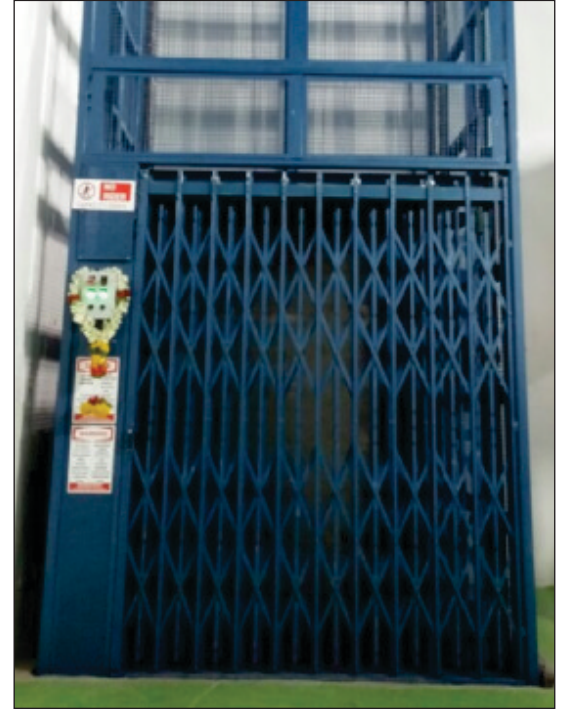

Hydraulic double mast goods lift is suitable to move any type of material from one floor to other floors. It comes in different sizes and capacities, it is completely designed to suite the customer requirements.

Features:

- We can manufacture the lift from 100Kgs to 3000Kgs with customized platform sizes
- Robust heavy duty honed tube & chrome plated shaft can be provided
- Outside superstructure covering/ ACP Sheet covering/Weld mesh covering can be provided as per customers requirement.

Safety:

- Collapsible door & bellow type door with electro- mechanical lock for interlocking will be provided.
- Hose burst valve will be provided for hose rupture safety.
- TI Diamond chain with carbon steel roller will be provided with additional safety of wire rope arrangement.
- Fault indicators with overload protection will be provided.
- Separate control station will be provided on all floor with emergency push button to stop the lift at anywhere.

Electro-Hydraulic Goods Lift – Single Mast

Hydraulic single mast goods lift is suitable to move any type of material from on floor to other floors by single hydraulic cylinder. It comes in different sizes and capacities, it is completely designed to suite the customer requirements.

Features:

- We manufacture the lift from 100Kgs to 1000Kgs with customized platform sizes up to 1400mmL
- Robust heavy duty honed tube & chrome plated shaft will be provided
- Outside superstructure covering/ ACP Sheet covering/Weld mesh covering can be provided on customer's requirement.
- Compact in size and economical.

Safety:

- Collapsible door & bellow type door with electro- mechanical lock for interlocking will be provided.
- Hose burst valve will be provided for hose rupture safety will be provided.
- TI Diamond chain with carbon steel roller will be provided with additional wire rope safety arrangement.
- Fault indicators with overload protection will be provided.
- Separate control station will be provided on all floor with emergency push button to stop the lift at anywhere.

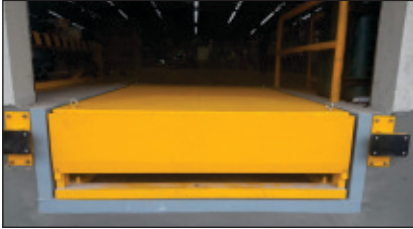

LIFTOCON

We Makes Your Material Handling Easy...

Electro-Hydraulic Dock Leveler

Liftocon provide dock leveler 6Ton / 10Ton / 15Ton / 20Ton within standard & customized sizes.

The Liftocon "Dock Levelers" has been designed to provide robust bridge to cover the gap between dock height to variable truck height for safe & continuous movement of material & equipment between the truck height & dock.

Features:

- Double cylinder provided for rigidity & durability with leveling accuracy.
- Non - reverse folding of robust hinge.
- Automated folding of Lip/Flap by double acting cylinder.

Safety:

- Chequered plate proper grip of moving equipment.
- It ensures automatic leveling.
- Lip locator ensures leveled dock area.
- Rubber dampers provided to avoid vehicle impact.
- Overload protection provided.

Movable Dock Ramp

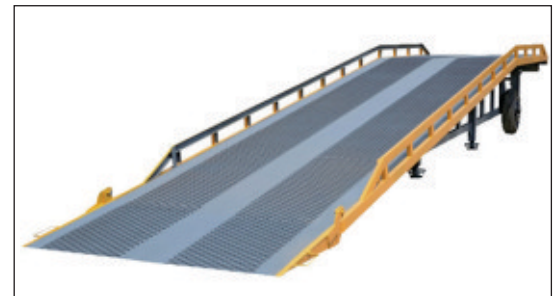

Movable Dock Ramp is special accessory equipment which can be used for rapid loading & unloading the goods with forklift & other handling equipment directly come into the container/truck with greatly increased working efficiency.

Features:

- We provide customized range of dock ramp as per customer's requirement.
- We provide "Movable Dock Ramp" 6Ton / 8Ton / 10Ton / 15 Ton/20 Ton- up to 30Ton.
- We provide hydraulic / mechanical / electrical operated ramp & electrical- manual operation.
- Dock/ bay/ loading platform not required.

Safety:

- Anti- skid torsion bar & grating provided for safe movement of forklift & handling equipment's.
- Earth lock provided for stability of equipment.
- Heavy solid rubber wheel provided.
- Hydraulic flap provided for jerk free operation of moving equipment inside the vehicle.
